

Schema Design

Entity Relationships & Constraints Specification

users % % % (tracks / creates) % % % %° meetings

A User records, processes, and owns multiple Meeting sessions.

meetings % % % (encrypts) % % % %° meeting_keys

Each Meeting is protected by an isolated AES-256 / RSA cryptographic key blob.

meetings % % % (generates) % % % %° action_items

A Meeting extracts multiple AI Action Items with completion status and priorities.

meetings % % % (revises) % % % %° transcript_revisions

A Meeting tracks versioned transcript and summary edits with SHA-256 hashes.

users % % % (registers) % % % %° speaker_profiles

A User saves recurring speaker voice profiles (e.g. SPEAKER_00 -> Abin George).

users % % % (syncs) % % % %° calendar_events

A User syncs Google Calendar & Outlook events for pre-scheduled bot auto-joins.

users % % % (logs) % % % %° search_history

A User logs natural language semantic vector search queries for client-side audit.
